PCT/GB2004/002262 Amended Claims

- A catalyst suitable for use in the hydrogenation of a hydrogenatable organic compound which consists essentially of a palladium compound supported upon a support material characterised in that said catalyst further comprises a compound of a lanthanide.
- A catalyst as claimed in claim 1 wherein the support is selected from silica, titania, magnesia, alumina, silica-alumina, a calcium-aluminate cement or a mixture of these compounds.
- 3. A catalyst as claimed in claim 2 wherein the support comprises alumina.
- 4. A catalyst as claimed in any of claims 1 3 wherein the mean pore diameter lies within the range 0.05 1 micron.
- 5. A catalyst as claimed in any of the preceding claims wherein the catalyst is in the form of shaped particles having a minimum dimension greater than 1mm.
- 6. A catalyst as claimed in any of the preceding claims, wherein the lanthanide compound is a compound of cerium, gadolinium or lanthanum.
- A catalyst as claimed in claim 6, wherein the lanthanide compound is a compound of cerium
- 8. A catalyst as claimed in any one of the preceding claims wherein the palladium is present at a level in the range of about 50 ppm to about 1% by weight calculated as Pd metal and the weight of the total catalyst.
- A catalyst as claimed in any of the preceding claims wherein the lanthanide compound is present at a concentration of 50 – 5000 ppmw based on the lanthanide metal and the weight of the total catalyst.
- 10. A catalyst as claimed in any of the preceding claims wherein the atomic ratio of Pd to lanthanide metal is in the range 1:0.5 1:3.5.
- 11. A catalyst as claimed in any of the preceding claims wherein the palladium is present in the form of palladium metal.
- 12. A process for the hydrogenation of a hydrogenatable organic compound comprising the step of passing a mixture of a gaseous feed containing said hydrogenatable organic

compound and hydrogen over a catalyst which consists essentially of a palladium compound supported upon a support material characterised in that said catalyst further comprises a compound of a lanthanide.

- 13. A hydrogenation process as claimed in claim 12, wherein said hydrogenatable organic compound comprises an acetylenic compound.
- 14. A process as claimed in claim 13, wherein said gaseous feed stream contains a minor proportion of an acetylenic compound and a major proportion of an olefinic compound, in addition to hydrogen.
- 15. A process as claimed in claim 13 or claim 14, wherein said gaseous feed stream contains a minor proportion of acetylene and a major proportion of ethylene, in addition to hydrogen.
- 16. A process as claimed in any one of claims 12 to 15, wherein said catalyst is a catalyst as claimed in any one of claims 1 11.
